silicon beach TRAINING

Certified Scrum Product Owner

Duration: 2 days
Price: £950 + vat

Prerequisites
This course will benefit Product Managers, Marketing and Sales people, Business Analysts, Project Managers or ScrumMasters who want to deepen their understanding of the Product Owner role. It is also suitable for those acting as coaches or consultants in transitioning an organisation to Scrum.

The Product Owner is key to the success of any Scrum Team. The Product Owner prioritises the work of the Scrum Team in order to maximise return on investment.

The Scrum Product Owner bridges the gap between clients and businesses by providing vision and guidance for the Scrum Team. This 2-day Scrum Product Owner Certification Course utilises a mixture of practical exercises, case studies and discussions to provide delegates with the necessary knowledge that a Scrum Product Owner needs to be able to drive a successful Scrum Project.

On completing the Scrum Product Owner Course, delegates will become a Certified Scrum Product Owner (CSPO). CSPO's are given two years of membership to the Scrum Alliance. This allows access to additional materials and information.
