City & Guilds 2395

Award in the Periodic Inspection, Testing and Certification of Electrical Installations

Course duration: 4 days inclusive of the online, multiple-choice examination and written paper
Qualification: City & Guilds Level 3

Course overview

This course is designed around the required syllabus for the City & Guilds 2395-01 exam and qualification. It is an advanced qualification and is becoming an industry standard for electricians and other contractors who are required to test and inspect their own, or others electrical installations.

- The Purpose and frequency of Periodic Inspection and Testing
- The main inspection requirements
- The requirements and sequence of tests
- Test apparatus
- Understanding and completion of the reporting and condition documents
- Practical exercises

Pre-entry requirements:

You must hold your 17th Edition Wiring Regulations Certification (BS7671: 2008 or 2011). We strongly recommend that delegates who wish to attend this course should also have a successful pass in either the 2392-10 qualification, or alternatively, be able to Test and Inspect confidently.

Who will benefit from this course?

Electrical personnel responsible for the inspection, testing, and certification of electrical installations operating up to 1000 volts in industrial, commercial and domestic premises. Participants should possess relevant experience and City & Guilds 2382-10/2382-12, 2394-01 or equivalent qualification.
