"bringing training to life"

Management of violence & aggression using control & restraint methods is a measure of last resort but for certain settings it is critically important to ensure service user safety. Staff also need to know how to protect themselves when their health is threatened. In such circumstances first class training is of paramount importance.

Course Programme (continued)

- Positional asphyxia
- Excited delirium
- 12 rules for safety
- Excerpts from the Bennett enquiry
- Prevention planning
- Level 2 Restraint Methods
- Causes of violence & aggression
- Mental illness & violence
- Learning disability & violence
- Communication & de-escalation
- Reporting & recording
- Compliance with statutory requirements

This course is highly interactive and delegates will receive instruction, practice and then be assessed for competency in level 2 restraint methods.
