

Stroke in Primary Care

This module will teach you how to manage people with, or at risk of, stroke in practice or in the community

Module validated by the Open University with 30 Credit Accumulation Transfer Scheme (CATS) points at Academic Level 5 (Diploma)

Undertaking Education for Health's stroke module will enable you to understand the risk factors for stroke, recognise the symptoms and identify how to meet the health and care needs of people who have had a stroke.

The module links with the NHS KSF, NICE quality standards & the Stroke Specific Education Framework, incorporating your role in:

- Communicating with people at risk of having, or who have had a stroke
- Maintaining the quality of the care provision for people at risk of having, or who have had a stroke
- Maintaining the health & wellbeing of people at risk of having, or who have had a stroke
- Providing information and resources for people who have had a stroke, and their carers

By the end of the module you will be able to:

- Identify the role of the health check process and GRASP-AF in preventing stroke
- Use the ABCD2 tool to establish risk of stroke following TIA
- Confidently articulate your role in early recognition and management of TIA / stroke
- Use guidelines available to identify best practice
- Identify ways in which you could plan to support and manage a person who has had a stroke, including the multidisciplinary team in that plan.

This module will take 6 months to complete and is delivered through comprehensive study materials.

Cost: £520
