Plumbing...

CITY & GUILDS 6129 LEVEL 2 IN PLUMBING

Course Overview

This level 2 course is open to both men and women who are wishing to work within the plumbing industry, on either an employed or self-employed basis. The course covers both the practical and theoretical aspects of plumbing, with the emphasis being on a hands-on approach. To attain the certificate, each trainee will complete a portfolio of practical and written evidence completed within our workshop and undertake several on-line multiple-choice examinations.

Duration

The course can be taken in an 8 week block, which is recommended, as this gives continuity of learning or if this is not convenient due to work commitments, we are able to split the course into weekly/fortnightly/monthly blocks. We are able to work around your needs, so please let us know your requirements.

Cost

£3,474 + VAT @ 17.5% = £4,081.95

This price includes all the training, examination entry fees, handouts, safety equipment, free tools, drinks and a post-course telephone help-line.

Certificates

Included within the cost of this course (for non-funded candidates) are two further courses. Successful candidates will gain:-

- BPEC Water Regulations
- BPEC Unvented Hot Water

Free tools and safety equipment

Each trainee will receive free safety equipment and a free blow torch.

Start dates for 2010

- 16th August
- 13th September
- 11th October
- 8th November
- 6th December

Plumbing...

CITY & GUILDS 6089 NVQ LEVEL 2 IN PLUMBING

Course overview

If you hold or are working towards your C&G 6129 level 2 in Plumbing, the next step to becoming a fully qualified plumber is to take the 6089 NVQ. Using the skills and knowledge learned during the 6129 course, you will demonstrate your abilities on-site in the workplace. An assessor or qualified supervisor will help you complete a portfolio of on-site evidence. You will be pleased to know that some of the work done during the 6129 can be transferred across to your NVQ portfolio as acceptable evidence.

On-site practical assessments

You will be asked to demonstrate your ability to:-

- install hot and cold connections to at least 2 different appliances, in 2 different locations
- decommission hot and cold connections from at least 2 different appliances, in 2 different locations
- rectify faults on at least 2 different installations
- make maintenance repairs to at least 2 different devices
- plan out the methods needed to undertake a job
- work safely with due regard to yourself and others
- take care of your customer's property
- correctly use ladders, stand-steps and mobile scaffold

This evidence typically takes 3 visits from one of our centre assessors. Relevant photographic evidence is also a requirement. We will guide you step by step along the way, giving advice as and when it is needed.

Cost

£1,200 + VAT @ 17.5% = £1,410

This cost covers 3 on-site visits. If you should need further visits, then an additional fee will be charged – this is usually £100 + VAT per visit, dependent upon the location.

RE-ASSESSMENT FOR EXISTING GAS FITTERS

Core + 4 Retraining – CCN1, MET1 plus 4 Appliances

Course Overview

This course is specifically designed for existing gas fitters who's 'ticket' is about to expire and need all their qualifications to be assessed in one block. The course covers CCN1 and MET1 plus 4 appliances of their choice. Most fitters choose to add CEN1, CKR1, WAT1 and HTR1.

Duration and Cost

Training and Assessment = 5 days @ £670 inc VAT

Who is this course for?

Any gas fitter who is in need of renewing their existing qualifications. This block training is available to existing registered gas fitters only. All necessary handouts and publications are provided.

Outcomes

On successful completion a fitter will be eligible to re-register their qualifications with Gas Safe and continue trading.

Choice of appliances...

MET1 - Meters
CEN1 - Central Heating
CKR1 - Cookers
DAH1 - Warm Air Heaters

WAT1 - Water Heaters
HTR1 - Fires
CPA1 - Flue Gas Analysis

Holders of CCN1 can apply for any or all of the above appliances -Training and Assessment per appliance per day = £140 inc VAT.

Re-assessment without training?

This method of assessment is not for the faint-hearted as you will receive NO training about any new skills or regulations that may have been brought in since your last re-assessment. If you feel this method is for you then please contact us.

“Great training, straightforward advice, and enjoyable”

NEW TO THE GAS INDUSTRY? WHAT TRAINING IS NEEDED?

To become Gas Safe registered a candidate must achieve CCN1 Core Gas Safety, this is an ACS gas competency certificate, which is valid for 5 years before becoming renewable. Here at Panda, we also include Meters - MET1, within the training course. The candidate can then choose to train on a variety of appliances. This choice will be dependent on the type of work the candidate intends to do out in the workplace.

Step 1

Initial in-centre training = 5 days @ £625 inc VAT

Introduction to gas safety, legislation and basic core gas safety skills.

Step 2

Building a portfolio, working alongside a registered Gas Safe engineer. Using the knowledge and skills gained within the initial training, the candidate will go out into the workplace with an engineer and complete a portfolio of evidence, to prove competency working with a range of appliances. There is no pressure to complete this evidence in a given time – it all depends on the amount of work you do with the gas engineer.

Step 3

Further in-centre training and assessment = 9 days @ £1,220 inc VAT

Once the portfolio of evidence is complete, trainees return to the centre to complete the core gas safety training and take the CCN1 and MET1 examinations. Once successful, candidates are eligible to register with Gas Safe to undertake pipework and meter related jobs.

Step 4

To gain a broader scope of knowledge, most learners choose to take specific training and qualifications which allows them to install and service individual appliances. Training and Assessment is available at £140 inc VAT per appliance per day - see the choices below:-

CEN1 - Central Heating

CKR1 - Cookers

DAH1 - Warm Air Heaters

WAT1 - Water Heaters

HTR1 - Fires

CPA1 - Flue Gas Analysis

“Great training, straightforward advice, and enjoyable

INDIVIDUAL APPLIANCES

Assessments of competence for operatives involved in the installation, removal and/or replacement of...

MET1 - Meters

...domestic gas meters up to 10m³ in volume.

CEN1 - Central Heating

...domestic gas central heating/hot water boilers and circulators up to 70kw.

CKR1 - Cookers

...domestic gas cooking appliances.

WAT1 - Water Heaters

...domestic gas hot water boilers.

DAH1 - Warm Air Heaters

...domestic warm air heating appliances.

HTR1 - Fires

...domestic gas fire appliances.

CPA1 – Flue Gas Analysis

CO/CO₂ detection and understanding the correct and safe use of a flue gas analyser. This is a mandatory ACS assessment for all gas engineers working with boilers, fires and modern day appliances.

MET1 is a one day course, assessment only at a cost of £120 inc VAT

All other appliances are available as training and assessment for one day per appliance at a cost of £140 inc VAT each

Electrical...

BPEC PART P ELECTRICAL

DEFINED SCOPE

Cost: £643 + VAT at 17.5 % = £755.52

2010 courses: Regular dates throughout the year – please call us with your requirements.

Duration: 5 days including training and assessment

Content: Basic principles, Legislation and regulations, Electrical safety, Installation theory and practice, Testing and documentation

Who is this course for?

This course has been designed for those such as plumbers and central heating or kitchen installers – who may want to carry out limited scope electrical work as part of their own overall business in domestic premises.

Building Regulations:

Recent changes to Part P of the Building Regulations now mean that it is illegal for an unqualified installer to carry out certain types of electrical work in domestic dwellings.

Join a Competent Person's Scheme:

Being a member of a Competent Person's Scheme allows the installer to self-certify their electrical work and the scheme provider will notify the Building Control Department on the installer's behalf – no further visits or costs are incurred.

Previous experience:

We recommend that candidates have some previous electrical experience before undertaking this course. The safety of both the installer and the customer is of utmost importance. This course is designed to ensure that simple and safe installation practices are established from the start and that they are followed throughout the duration.

FULL SCOPE

Cost: £190 + VAT = £223.25

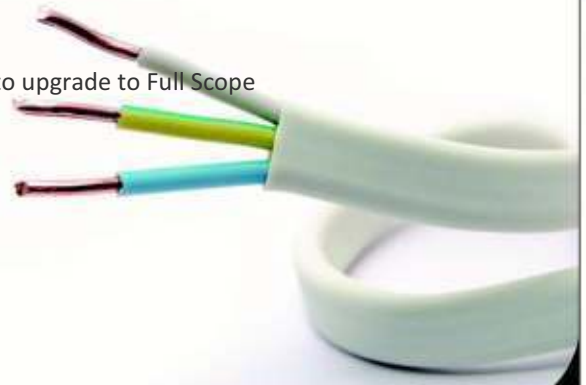

2010 courses: Mutually convenient dates

Duration: 2 days including training and assessment

Content: Includes Consumer units, New circuits, Outside cabling

Who is this course for?

This course is for holders of the BPEC Defined Scope qualification who wish to upgrade to Full Scope
