Testimonials

- *Every second was a journey in itself,* every minute a recovery, every hour and every day opened my mind to possibilities. I thought the size of the group was perfect and the support I received from Robert and each other was one of the most incredible aspects of the course. Thank you.

- *Even more useful that I expected it to be.* I enjoyed the challenging different ways of learning and I look forward to recognising my own development through time into the future. I just loved the course and loved the learning being in a small group, felt safe and allowed all of us to delve deeper than we possibly would have done in another environment. Thanks again for the journey
