PRINCE2® Accredited by APM GROUP

PRINCE2®
Practitioner Course

Course Code PSPM09

Duration 5 Days

About the Programme

A 5 day course aimed primarily at project managers, but of great value in many other roles, such as:-

- Programme Management
- Project Board (Project Steering Group)
- Project Support Office
- Quality Assurance
- Configuration Management
- Risk Management

Delegates will gain a thorough grounding in the PRINCE2 method, and will apply the method to a given scenario, to ensure that they are able to use the method in practical situations.

The course includes both the Foundation and Practitioner examinations. The Foundation examination is a 1 hour multiple choice test. The Practitioner examination is a 2.5 hour open-book examination leading to the internationally recognised PRINCE2 Registered Practitioner qualification.

What is PRINCE2?
PRINCE2 (Projects IN Controlled Environments) is a structured method for effective project management. It was launched in 1996, in response to user requirements for improved guidance on project management for all projects, ***not just information systems projects***.

Why use PRINCE2?

PRINCE2 is:-

- Widely used by government departments and throughout industry
- Rapidly becoming the industry standard project management method
- Repeatable
- Teachable
- Builds on experience
- Ensures that everyone knows what to expect, where, how and when
- Gives early warning of problems
- Proactive, not reactive, but able to accommodate unexpected events
- Manages any interaction with other projects or a larger programme of work
