IOSH Managing Safely

A Four or Five-Day Management & Development Programme delivered in partnership with UK approved IOSH providers.

▶ Course Information

This course accredited by IOSH – the Institute of Occupational Safety and Health offers an opportunity for businesses to train their staff to a widely accepted UK standard. Having recently undergone a major re-vamp this course is even more innovative, interactive and fun. The course provides delegates with the knowledge and skills necessary to manage the health and safety of others in a modern business.

▶ Who Should Attend?

This course is ideal for Managers at all levels; those requiring an understanding of health and safety management and those with responsibilities for Contractors.

▶ Course Content

- ▶ Principles of 'loss control and accident prevention'
- ▶ Concept of the 'near miss'
- ▶ Principles of successful safety management
- ▶ Accident and 'near miss' reporting
- ▶ RIDDOR 1995
- ▶ Civil/criminal law differences as they affect health and safety
- ▶ Health and Safety at Work etc Act 1974
- ▶ Employers and employees duties
- ▶ How to find and use safety information
- ▶ Powers of Inspectors
- ▶ Risk assessment
- ▶ Permits to work
- ▶ Safety consultation (committees and forums)
- ▶ Specific hazards/risks including fire, vehicles, machinery, COSHH, electricity
- ▶ Monitoring safety performance
