- RISK ASSESSMENT - EXERCISE 2
- The Information Pack (as per the APS)

The three day accredited course includes an examination and, subject to successful completion of this examination, would allow the delegate to claim points as allocated in the table of points towards meeting the registered membership threshold. They will also be exempt from sitting the entrance examination for admission as registered member of the association for a period of three months from the date on which the APS issues a certificate confirming successful completion of an accredited course.

Current APS members may use this course as a refresher and, upon successful completion of the exam, will then be exempt from sitting the on-line APS transfer examination for entry onto the CDM(c) register.

As you may be aware, the Association for Project Safety has recently changed their membership requirements and their new scheme is based on a points system. Details of this are available on their website at the following link:

http://www.associationforprojectsafety.co.uk/membership/full/becomeamember/documents/Guide010709.pdf
http://www.associationforprojectsafety.co.uk/membership/full/becomeamember/documents/5CreditTables220609.pdf

Our fee to provide this course as a three day accredited course would be £2600.00 + VAT. A fee of £175.00 + VAT per delegate would apply to cover the cost of APS delegate fees, HSE Approved Code of Practice, APS Guide to the Management of CDM Co-ordination, Course Handouts, etc. The three-day course includes an examination and the fee for handouts also includes for APS certificates (subject to successful completion of the exam) and CPD certificates. These certificates will be issued after the course is completed and would be issued to candidates post the event. To these fees we would add travel expenses and overnight costs to this fee. Again, these would be agreed prior to the course and invoiced post the event.
