

INTELLIGENT SECURITY TRAINING

INTELLIGENT SECURITY TRAINING

Tactical Handcuffing and Restraints Course

Introduction.

This six hour certification course is the one of the most complete and innovative handcuffing courses in the country.

A lack of credible training in the security sector leaves staff, service users and employers at risk of harm, prosecution and substantial compensation claims.

Security personnel in the UK are increasingly carrying out a law enforcement function and may be required to use force and exercise powers of arrest both as citizens (security & enforcement officers) and as Crown Servants (Fisheries Officers and Court Bailiffs).

Our Skills are based around Israeli, US and UK Police techniques. They can be mapped to existing techniques used by the Police and are Court credible. The training requires to be refreshed once per year to remain court credible.

The issue with many handcuff courses on the U.K market is that they deal pre-dominantly with the safety issues surrounding the use of handcuffs and deal very little with the reality of applying handcuffs to a non compliant subject.

Although we are influenced heavily by Law and legislation regarding the use of force, we believe we take a more realistic approach to Handcuffing than some other U.K programs.

In our opinion the failing point of these courses is the tendency to concentrate on practicing handcuffing a compliant person – i.e they are willing to let the security agent to place restraints on them.

This is unrealistic as most people will be aggressive and will not wish to be placed under restraint.

This is where our handcuffing program is different.

Not only do we cover all of the basics, as with the Btec or NCFE program, we also cover the more tactical aspects of handcuffing a non compliant individual.

All of this is learned while still operating within the realms of the British legal system as we fully understand the implications associated with the use of Handcuffs by security professionals.

Benefits of Our Handcuffing Program.

- Reduced likelihood of injury to staff and subjects
- Reduced exposure to criminal and civil liability
- Increased performance, efficiency and speed when applying handcuffs
- Increased confidence and staff morale
- Increased safety for all

Course Contents

Theoretical

- Health & Safety
- Human Rights Act
- Use of Force
- Warning & Danger Signs
- Resolving Conflict
- Theory of handcuffing technique
- Medical implications of the prone position (positional asphyxiation)
- Different types of handcuffs including tri-fold restraints.

Practical

- The tactical approach
- Movement and stance options
- Verbal skills
- Weapons of the body
- Defensive strikes and feigns
- Escorting and Controlling Holds
- Achieving the “S” position
- “S” position control and variables
- Control on the ground
- Various pinning techniques
- Teamwork applications
- Live scenario training

INTELLIGENT SECURITY TRAINING

INTELLIGENT SECURITY TRAINING
