Abrasive Wheels (B.A.F)

Training Courses

Kentec Training has been granted accreditation by the British Abrasives Federation (B.A.F) to provide operator training courses in the safe use of abrasive products. The Provision and Use of Work Equipment Regulations (PUWER) demand a **legal** requirement for training and also the scope of people requiring training.

As training providers, we undertake many abrasive wheel courses for a vast range of clients; this generally takes place at our training centre in Tonbridge, Kent or the client's premises or sites, subject to facilities, at a time to suit them.

Suitable for: Our half day (Portable Machines only) and full day (Portable Machines and Bench Mounted Grinders) training courses are designed for anyone in your organisation that uses, mounts, specifies, supervises or manages the use of abrasive wheels in the work place.

Course Aims & Objectives: The course will enable delegates to ensure that safety issues are managed efficiently, protecting the workforce, other people and the general environment, and will ensure that legal compliance is achieved.
Abrasive Wheels are used in many areas and can be highly dangerous if used by untrained or incompetent operators.

The Half Day Course (typically 8.30am to 12.30pm) content includes:

- Overview of Health and Safety Legislation inc. HSWA 74, PUWER 98
- Hazards, Risks and Risk Control Measures
- Noise and HAVS Hazards
- Accident Causation and Prevention
- Personal Protective Equipment (PPE)
- Types of Abrasive Wheel Machines
- Resin Bonded Abrasive Wheel Inspection - **Types 27, 41 & 42**
- Practical Exercise – Abrasive Wheel Inspection
- Pre-Use Machine Safety Checks
- Mounting Abrasive Wheels on **Angle Grinders**, **Chop Saws** and **Disc Cutters**
- Practical Exercise - Mounting Abrasive Wheels to chosen Machine(s)

The Full Day Course (typically continues 1.00pm to 3.30pm) content includes:

- Vitrified Bonded Abrasive Wheel Inspection - **Type 1**
- Practical Exercise – Abrasive Wheel Inspection
- Vitrified Wheel Specification Exercise
- Pre-Use Machine Safety Checks
- How to Balance Abrasive Wheels
- Mounting of Vitrified Abrasive Wheels on **Bench Mounted Grinders**
- How to Dress and True Abrasive Wheels
- Practical Exercise - Mounting & Truing of Abrasive Wheels to Bench Grinders

Kentec Training's course content, instructors and training premises have been subjected to regular and rigorous assessment and audit to ensure compliance with the high standards demanded.

Availability and Places:
Here at Kentec Training we understand how difficult it can be to arrange a course with a busy work schedule.
Therefore, for bookings of between 4 and 12 candidates, we allow you to choose your preferred date for an Abrasive Wheel Training Course at our training centre.
For smaller bookings we hold 'Open Courses' at our Training Centre on a regular basis. Please visit our website for a full schedule, available places and rates at: www.kentectraining.co.uk

Course Duration:
Minimum 4 Hours (½ Day)

Individual Price (Half Day Course):
£82.50 + vat per person

Group Rate (Half Day Course) From:
£55.00 + vat per person
