Course Information

COURSE OVERVIEW

Physics (IGCSE)

The IGCSE in Physics aims to impart a systematic body of scientific knowledge and skills as well as foster an appreciation of the practical nature of physics. Experimental and investigative skills based on safe, correct safe laboratory techniques will be developed. Students will also gain an appreciation of scientific methods and learn to form hypotheses and design experiments to test them.

Key subject aims

- To impart a systematic body of scientific knowledge and the skills needed to apply this in new and changing situations in many domestic, industrial and environmental contexts
- To foster an appreciation of the practical nature of physics, and develop experimental and investigative skills based on correct and safe laboratory techniques
- To develop an appreciation of the importance of accurate experimental work and reporting to scientific method
- To enable students to form hypotheses and design experiments to test them
- To enable students to evaluate, in terms of their scientific knowledge and understanding, the benefits and drawbacks (including social, environmental and economic) of scientific and technological developments
- To enable students to select, organise and present information clearly and logically, using appropriate scientific terms and conventions.

The practical work described at various places in this course helps you to develop your skills for the practical-based components of the theory exams. It is not essential to carry out this work yourself, but if you can undertake some of it at home, or have the opportunity to perform supervised laboratory work in the course of your studies, this will be a great help.

Frequently Asked Questions

Q. How does distance learning work?

A. To ensure studying is flexible and convenient, most of our courses are divided into sections. You work through each section at your own pace and time. Once completed, send the test paper back to your personal tutor for marking. You will then move onto the next section once successfully completing the previous section. The support period is dependent on the type of course you choose; our minimum support period is one year.

Q. When can I start the course?

A. The answer is simple, when YOU want; you can start the course at any time since we do not have any set enrolment dates. Most of our courses don't require any previous experience or qualifications. All you need is a desire and motivation to succeed. You can even start right now - call and speak to one of our Professional Course Advisors.

Q. How long do the courses take?

A. This is dependent upon your choice of course and how fast you want to learn. A full breakdown of the course is available in your course literature. We do provide estimated number of study hours; ask our course advisors for details.

Q. I want to buy a course that is not on the course list. What do I do?

A. Our website has an excellent list of the most popular courses on the market. However, we do have access to a more in-depth portfolio should you not find the course you are looking for. You can call our course advisors and discuss the course you are interested in.

Q. Do the courses have tutorial support?

A. Yes. You will be allocated an experienced tutor who will guide you through the course, mark your assignments and generally help you with any problems you may have. Your tutors can be contacted via email and post.

Q. If I fail an assignment can I retake it?

A. Yes, your tutor will ask you to resubmit your assignment and give you support as to where you could improve.

Q. How do I get help with my course work?

A. You can get help 7 days a week by email, or post from your dedicated tutor, you just email your assignments for marking. You have to send your assignments one at a time so the tutor can mark one and give you the feedback.

Q. Will I get a qualification at the end?

A. Yes, for all our courses, you will receive a diploma or a recognised qualification from the awarding body for your course.

Q. Is the course work done online or sent via the internet?

A. No, the work is done offline using your PC or for paper based courses working through your course folder. All the assignments are in the course manual so there are no online costs incurred.

Q. Is there a time limit or any deadlines?

A. We do like you to complete the course within the tutor support period but we can extend this for a small charge (currently £80 for 12 months). If you follow the recommended study hours, this will give you a good guide.

Q. Will I have to sit an examination?

A. Most of our paper based courses do not require you to sit examinations, only continual assessments. Where there are examinations required, you will receive all the information you need to make your own exam arrangements. Please note exam fees are not included in your course fee, unless otherwise stated.

Q. How quickly will I receive my course material?

A. Once your payment has been received and cleared your enrolment should be processed within two days and your course materials delivered within 5 days. For customers who choose to pay in instalment this can take longer as we need a signed agreement back from you before we send the course materials.

Q. Do I have to buy any other materials?

A. Our comprehensive course materials are designed to be self-contained with all the relevant information you require to complete the course and gain the relevant certification. However some of our students undertake additional reading via relevant textbooks/study guides and/or the Internet to add value to their studies.

Q. I'm not sure of what course I should take? Can you help?

A. Yes we can, it is important that you pursue a course which you will enjoy. Although we cannot make this decision for you, we employ a team of dedicated Professional Course Advisors, who will guide you towards making the right choice.
