

Course Number
SC0107.1

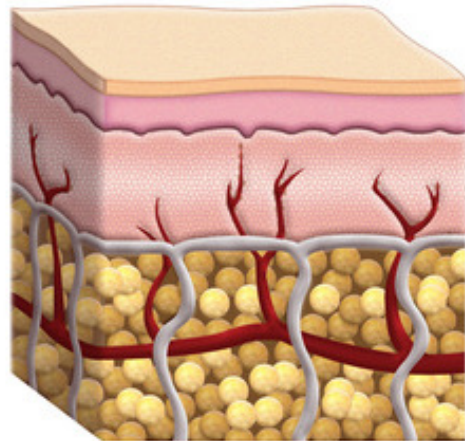

Validity
1 Year

Duration
1/2 day

Formal Assessment
No

This course is for qualified staff who already have a basic understanding of wounds including pressure sores and require further training in their practical management.

Attending delegates will learn about wound etiology, phases & assessment, exudate, debridement and the choice of dressings and their application.

Introduction

- Introductions, course overview & expectations

Course Programme

- Subject knowledge assessment
- Professional, legal & ethical issues of wound management
- Wound etiology
- Wound types
- Wound phases / healing
- Factors affecting healing
- Dressing types & selection
- Summary & course evaluation

Delegates attending this course will benefit from having previously attended our SC0107 Pressure Area Care course.

This course can be extended to a full-day duration upon request to allow for more in-depth examination of the key aspects of tissue viability and wound care.
