Course Description

If you want to develop your knowledge of aromatherapy so that you can embark on a career in this sector or you are already working in a related field and want to improve your career prospects, then this is the course for you.

Aromatherapy is a skilled and controlled practice using essential oils, for physical, emotional health and well-being.

Aromatherapy is a form of alternative medicine that uses unpredictable liquid plant materials, which is known as essential oils (EOs). And it is for psychological and physical well-being.

Aromatherapy is the therapeutic use of plant-derived, aromatic essential oils to promote physical and psychological well-being. It is sometimes used in combination with massage and other therapeutic techniques as part of a holistic treatment approach.

The Distance Learning **Aromatherapy course** covers the history, philosophy and purpose of aromatherapy. You will learn how to blend essential oils to create different treatments and how to offer treatments safely and professionally.
