only £285.00/£315.00

A Distance Learning Course is the ideal way to gain a qualification without having the worry of trying to fit your studies around your everyday life. You can complete your studies in your own time and we are on hand seven days a week to help you plan your future.

Course Description

If you are great with children or have always wanted to work with them, this may be the course for you.

Understanding Child Psychology is a captivating and rewarding way to gather knowledge about how a child's mind works and why they behave and react to situations as they do.

Our praised Child Psychology course helps anybody who wants to work in the childcare sector to gain an accreditation that is acknowledged throughout the industry. Better still, this fantastic course requires **no previous experience**, just a desire for the subject!

Whether you are a parent wanting to gain a better understanding of their child's development needs, a social worker wishing to gain further expertise in dealing with family situations involving children or a professional educator needing to broaden knowledge of their charges' psychology, this Distance Learning Child Psychology course is for you.

This course covers the various stages of child development in some detail. Firstly from the First Year of Life and the subsequent forming of attachments, the consequences of breakdown of those attachments (including maternal deprivation) and then moves through the issues of social groups and school, the development of language and communication and much more.

The course goes on to explore research methodology, learning theory and psychodynamics, issues surrounding behaviour management and aggression.

On completion of the Child Psychology Course, it will help you to:

- Develop an awareness of psychological approaches to the understanding of child development
- Develop a recognition of the application of developmental psychology certain aspects of childcare and education
- Create an awareness of different methodological approaches to psychological investigation
- Develop a range of skills in using psychological methods

Previous Knowledge Required

You do not need any prior learning knowledge or experience to take this course. This course is openly available to anyone who wishes to take part in a highly rewarding home study course, although you would be expected to have a reasonable standard of literacy. You have the freedom to start the course at any time and continue your studies at your own pace for a period of up to 12 months from initial registration with the full support of your Tutor.

Support

You will receive the entire package of course materials in a single dispatch together with dedicated Tutor Support for 12 months. All assignments are marked by one of our professional Tutors who will offer regular feedback and guide you through your course.

You will be provided with the telephone number for your dedicated Student Support Team who will be available for any other queries that you may have whilst completing your course. You can be assured that you will receive unlimited support for your home study course, so there is no need to struggle or feel isolated during your studies.

Assessment

You must successfully complete a series of activities and assessments. Once all assessments and activities have been completed, you will then be awarded your certificate. The good news is, there is no final exam.

Modules

UNIT 1: INTRODUCTION

Sections:

What is Child Psychology?

Psychology As a Science

Research Methods

Underlying Debates in Child Psychology - nature nurture and personality

UNIT 2: SOCIAL DEVELOPMENT AND THE FAMILY

Sections:

Child's sense of self and personality

Attachment

Privation, deprivation, institutionalisation

Parenting styles and effects on child development

UNIT 3: SOCIAL DEVELOPMENT

Sections:

Social interaction, learning and play

Gender development (social and cognitive theories)

Moral development (social and cognitive theories)

Pro- and anti-social behaviour

UNIT 4: COGNITIVE DEVELOPMENT

Sections:

Development of sensory perception

Language development and acquisition

Cognitive development

Measured intelligence

There is continuity between the units, and when, for example, the same psychologist is mentioned in different sections and/or units, you will be reminded. This will help you to learn each topic at a time, and to build up a more complete overview of child psychology. The first time a key psychologist is mentioned, a short biographical sketch is included to help you see the psychologist's theories in their historical and cultural context.

Psychology is a social science which means it studies people in a more holistic way than a physical science, such as biology does. 'A' level psychology courses (which are also level 3) have been recently modified to focus more on psychology being a *science*. As with current 'A' level courses, the scientific nature of psychology is introduced in Unit 1, and forms an integral part of all other units.

Awarding Organisation

This course has been accredited under NCFE IIQ Licence. At the end of this course successful learners will be awarded a certificate of achievement by NCFE. The training courses have been designed specifically to meet the needs of learners who prefer to study from home. The course measurable learning outcomes have been benchmarked at Level 3 (using Ofqual's Qualification and Credit Framework (QCF) level descriptors) to allow you to consider the depth of study, difficulty, and level of achievement involved.
