Why become a professional hypnotherapist?

Hypnotherapy is one of the most interesting and rewarding professions which can also offer you an outstanding career path. Not only can you make a strong income, but you can also gain a real sense of achievement out of helping thousands of people to overcome problems which disrupt their lives.

As Governments move towards more talking therapy and less reliance on use of medication it means that the potential market for therapy has seen a recent rapid expansion and this is set to continue.

A highly lucrative career path

Like any clinical expert, hypnotherapists are able to charge a good hourly rate which offers the potential for a powerful financial income.

Whether starting your own full time practice or supplementing your income part-time, professional hypnotherapy can provide a well-paid income which allows you to enjoy a nicer home, better holidays, new cars, finer food and more financial security.

You're only limited by your own drive to be the best possible hypnotherapist you can be, and The Surrey Institute of Clinical Hypnotherapy (SICH) offers you all of the training and tools to help you reach your maximum potential. At SICH, we don't just train you to become a hypnotherapist – we train you to become a successful one.

Extremely rewarding and exciting

Put off by the mundane grind of a normal 9-5 job?

No two days as a hypnotherapist are ever the same, and a wide variety of clients allows you to meet interesting new people and always have something new to experience.

Hypnotherapy is also one of the most rewarding jobs to enjoy. There's no greater sense of achievement when you can help to resolve a client of a debilitating problem which has been holding them back for years. This makes becoming a hypnotherapist ideal if you take great satisfaction out of helping others.

An exceptional income opportunity with a fulfilling career

With a strong salary potential, plenty of rewards and growing recognition as an effective method of treatment for many of the UK's most common ailments, now is the ideal time to train as a hypnotherapist and NLP practitioner with SICH.

What is SICH?

The Surrey Institute of Clinical Therapy (SICH) is a leading school of excellence in hypnotherapy training.

SICH has multiple clinics in Surrey and London where it treats its own clients and also provides expert training courses which give people the skills to become professional hypnotherapists.

What is the SICH diploma in this prospectus?

The SICH Clinical Hypnotherapy and NLP diploma gives you all of the skills, protocols, knowledge and confidence to immediately start treating your own clients with expert hypnotherapy and neuro-linguistic programming (NLP). Optional modules also allow you to train for an NCH diploma to go alongside your SICH diploma.

Accredited by the National Council for Hypnotherapy (NCH)

The SICH diploma in this prospectus is accredited by the National Council for Hypnotherapy and also allows you to become a full member of all hypnotherapy associations.

Your tutors

The tutors who teach you are some of the UK's leading hypnotherapists who have trained under world-renowned specialists such as Gil Boyne and Paul McKenna. Paul White and Paul Howard, the two main tutors for your course, have both operated thriving hypnotherapy clinics and also held top-level boardroom positions within the National Council for Hypnotherapy.

The course

Whether you take the intensive 4 week course or the more spread-out weekend course, you will receive 20 total classes which take you through all of the modules you need to become a professional hypnotherapist. The classes are located in Surrey and London where your tutors take you through each module, show demonstrations and even allow you to practice on real clients under strict supervision.

At SICH, we don't just teach you how to become a highly skilled hypnotherapist - but a highly successful one. You get the skills to resolve your clients of debilitating problems and the knowledge which enables you to start your own thriving hypnotherapy practice whilst enjoying the powerful income potential of professional hypnotherapists.

Why choose SICH for your hypnotherapy training?

1). An established institute with a proven track record

SICH has been established for over 11 years with a head office in Surrey and clinics in Wallington, Richmond, Camberley and world-famous Harley Street in London. This means that you will join a vast number of other students who have successfully studied for their hypnotherapy diploma in professional learning environments.

2). Receive a formally recognised qualification

The diploma you're awarded is accredited by the National Council of Hypnotherapy and recognised by all professional hypnotherapy bodies. This enables you to apply for membership in a hypnotherapy association. The diploma is also recognised by the Open University and contributes "credits" towards degree courses.

3). Simple, easy to understand and tailored to you

The course is adapted to your skills and learning abilities, with the training broken up into simple modules which are easy to understand and learn. Despite such easy learning, the course is still highly comprehensive.

4). Focus on the "bread and butter" treatments for a successful career

Whilst the diploma covers everything to do with hypnotherapy and NLP, we focus primarily on the most common issues which you're going to deal with most of the time as a hypnotherapy practitioner. This includes weight issues, smoking, anxiety problems, drug problems, gambling and more. With this approach, you get better skills in the type of treatments which are going to provide the majority of your income throughout your career.

5). Giving you everything you need to start your career immediately

SICH will give you all of the scripts, interview forms, protocols and skills you need to immediately start practicing as a hypnotherapist at the end of your course, so you can start your new career as soon as it's complete.

6). Giving you knowledge, skills and confidence

The course doesn't just provide the knowledge, but also the practice to hone your skills and gain the confidence to deliver first-class hypnotherapy treatments in an assured manner.

7). Learn from the experience of expert tutors who have treated their own clients

Our main tutors complete around 1500 client hours per year each, and therefore have considerable experience in providing the highest quality tuition to help you learn more skills in a shorter time frame. Plus, as the tutors have managed their own successful hypnotherapy practices, you can also learn the "tricks of the trade" which they've used to help their own practice thrive.

8). Learn hypnotherapy skills and business management skills

SICH strives to help you become a successful hypnotherapist. That's why we include information about business management which helps you to attract more clients and become more successful.

9). Practice with real clients

You will have the opportunity to work with real clients under strict supervision, so you can gain first-hand practice of client interviews, pre-induction talks and conducting hypnotherapy with the client.

10). Receive close personal attention

SICH is for those who want the highest quality learning, which is why we limit classes to 10 students with 2 tutors to make sure that you receive the most personal attention possible during the course.

About the diploma and qualifications

The SICH clinical hypnotherapy and NLP diploma teaches you everything you need to know to become a professional hypnotherapist and neuro-linguistic programming (NLP) specialist.

You are given the skills, scripts, interview forms, protocols and everything you need to start treating your own clients and helping them to solve problems such as weight issues, smoking cessation, anxiety conditions, problem behaviours and more.

There are no exams or tests, with the diploma and certificates being awarded based on continual assessment and observations of your practical exercises. Upon completion of the course, you will receive a diploma and certificates which are recognised by the majority of professional hypnotherapy bodies. This enables you to become a member of many professional hypnotherapy associations.

When the course is completed, you will receive the following:

- SICH Hypnotherapy Practitioner Certificate
- SICH Hypnotherapy Practitioner Diploma
- SICH NLP Practitioner Certificate

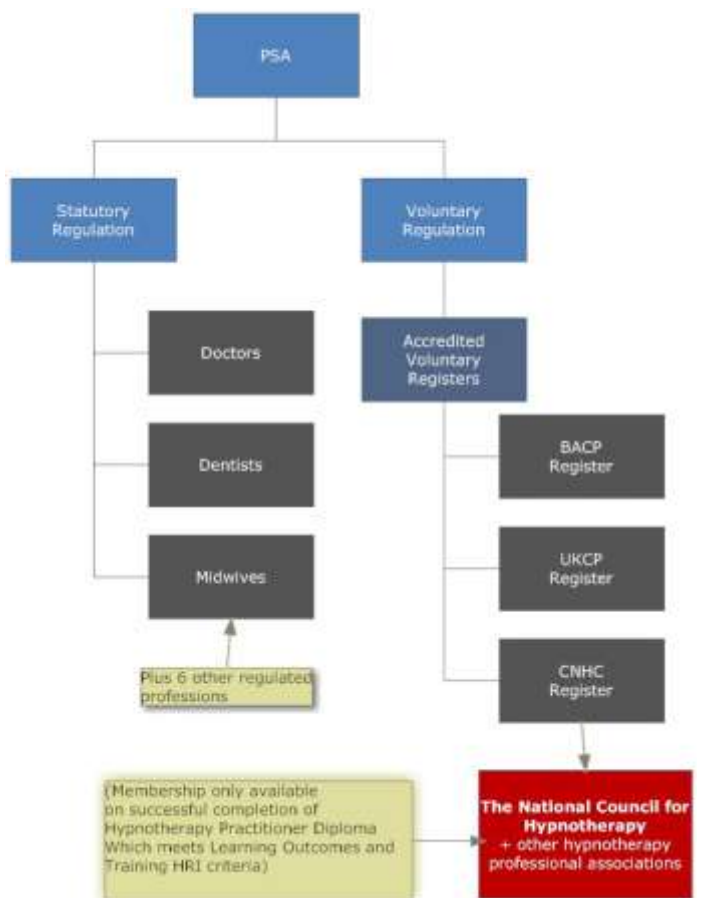

These certificates will also allow you to use the letters HPD and CNLP after your name.

Optional NCH Hypnotherapy Practitioner Diploma

Modules 1 to 3 provide all of the skills you need to be a professional hypnotherapist along with the SICH accredited diploma, SICH certificate and SICH NLP certificate, which are issued by the Surrey Institute of Clinical Hypnotherapy.

Module 4 is dedicated to receiving the NCH Hypnotherapy Practitioner Diploma, which is issued by the National Council for Hypnotherapy. Despite the similar names, the NCH diploma is different in that it is externally accredited by the NCH and NCFE, which is a UK's National Awarding Government Body.

The NCH Hypnotherapy Practitioner Diploma gives you a higher level qualification and allows you to become a full member of National Council for Hypnotherapy. This will enable you to register with the CNHC as a hypnotherapist. The CNHC is approved by the Professional Standards Authority (PSA), in the same way that Psychotherapists and Counselling Professional Associations are approved by the PSA. However, the SICH Hypnotherapy Practitioner Diploma still gives you everything you need to become a professional hypnotherapist, so you are welcome to take modules 1 to 3 to achieve the SICH Diploma and can then optionally take module 4 if you want an NCH Diploma as well.

About the tutors

Choose SICH and you will be taught by some of the UK's leading hypnotherapy tutors who combine the pinnacle of hypnotherapy skill with years of tutoring experience and also vast experience in operating their own highly successful hypnotherapy businesses.

You wouldn't expect anyone to train you to have a successful career in hypnotherapy if they had failed to achieve a successful career for themselves! That's why SICH tutors have a proven track record of highly skilled hypnotherapy, multiple cases of successfully treated patients, commercial relationships with former multinational companies, affiliation with the official hypnotherapy bodies and thriving success with their own practices.

Paul Howard

Paul Howard studied under Gil Boyne, who is renowned worldwide as one of the world's greatest clinical hypnotherapists with over 48 years of experience. Paul has also trained with Paul McKenna, Michael Breen and Richard Bandler, where he qualified as a hypnotherapy and NLP practitioner.

Paul specialises in treating anxiety and is a leading expert in using hypnotherapy to help people with psoriasis.

In 2006, he was invited to join the executive committee of the National Council for Hypnotherapy as the Marketing Director.

"The journey you're embarking on to become a hypnotherapist will almost certainly have a profound effect on your life.

Many of our students not only discover how the mind works but also gain tremendous insight into their own life."

Paul Howard

Paul White

Paul White also studied with Gil Boyne and achieved an advanced diploma in clinical hypnotherapy with the Hypnotherapy Training Institute of Los Angeles. Paul has also studied with Paul McKenna, Michael Breen and Richard Bandler to qualify as an NLP practitioner.

Paul specialises in paediatric hypnotherapy, and has trained with the Canadian Institute of Hypnotism whilst being accredited by The USA National Guild of Hypnotists. Paul has also completed postgraduate studies in problem behaviours including alcohol, drugs, gambling and other addictions.

Alongside this, Paul has served as a professional standards officer and director of ethics for the National Council for Hypnotherapy. He also served as the chairman of the National Council for Hypnotherapy for over 5 years - only stepping down in summer 2013 to focus on providing tuition with the SICH.

Due to Paul's long and prosperous career, he was awarded Fellowship of the NCH for an outstanding contribution to the profession and is currently a Fellow of The Royal Society of medicine.

"To be an effective hypnotherapist, you have to think like a therapist. It isn't just about a list of techniques.

That's why we use a varied approach involving cognitive, behavioral, dynamic and integrated theories, so our students are not restricted in their approach to helping clients." **Paul White**

About the course – what to expect?

The course includes 3 weeks of total learning based in London/Surrey. You will be in a class of no more than 10 students with 2 tutors to make sure you receive close personal attention.

Two main courses are available:

- Intensive diploma – The course is taken in **3 or 4 weeks** with classes every day from Monday to Friday
- Weekend diploma – The course is broken up into **2 days per month** over a **8 to 10 month** period

Both courses contain the exact same course material, the same 1-3 modules (with optional 4th and 5th modules available) and the same 120 total hours of classroom tuition over 16 classes (or up to 160 hours and 20 classes with the optional modules added). They are simply taught at a different pace to suit your availability. The weekend diploma is particularly useful if you have work commitments during the week.

The curriculum

SICH have designed the curriculum to be accredited by the NCFE – the national government awarding body - and the NCH – the National Council for Hypnotherapy. This means that the courses meet the criteria outlined in the National Occupational Standards for Hypnotherapy which are laid down by Skills for Health.

Modules

The course is broken up into various modules (more below) with supplementary documents, scripts and protocols to assist your learning. Each module breaks the course up into bite-size chunks for easier learning, so you can confidently complete one module before moving on to the next.

600-page course manual

You will receive a comprehensive 600-page course manual to study during the course and take home with you when you have your diploma. This tells you everything you need in an easy-to-understand format to help make learning easier. It's also a fantastic document to refer back to if you ever need to brush up on your knowledge during your career.

Fun and exciting learning

The majority of the course will be spent being taken through the modules by SICH founders Paul White and Paul Howard. The learning experience is designed to be fun, friendly and enjoyable with plenty of open debate.

Real practice with clients

During the course, you will be able to work with real clients to help you understand how changes take place. This will be carried out under strict supervision so you feel at ease as you go through the steps and conduct your very first hypnotherapy session. You can even offer friends and family the opportunity to take part free of charge. At SICH, we don't just fine-tune your knowledge, but your skills as well.

What are the main course modules?

Both the weekend and intensive courses have the same 1-3 main modules with optional 4th and 5th modules:

Module 1 – Hypnotherapy Practitioner Certificate

This module introduces you to the basics of hypnotherapy and culminates with you conducting a full smoking cessation hypnotherapy session with a smoker under supervision with one of your tutors. Topics include:

- The history of hypnosis
- Self-hypnosis
- Hypnotic inductions
- Deepening the hypnotic state
- Awakening the subject
- Ethical hypnotherapy
- Client interview/intake form
- Taking a case history
- Smoking cessation
- Working with a real client
- State vs. non-state
- Suggestibility tests
- Transference
- Different approaches to therapy
- Visualisation techniques
- Aversion techniques

Modules 2 and 3 – SICH Hypnotherapy Practitioner Diploma

These modules build on the knowledge gained in module 1 to teach you the skills which are required for you to treat your own clients as a clinical hypnotherapist. Topics include:

- Rapport building
- Recognising an hypnotic trance
- Analytical hypnotherapy
- Values and beliefs
- Direct and indirect intervention
- The five main fears
- How to form suggestions
- Cognitive behavioural therapy (CBT)
- Self-hypnosis and ego strengthening
- Regression to cause and dealing with the initial sensitising event
- Anxiety (social and agoraphobia)
- Phobias
- Weight control and eating disorders
- Problem behaviours (alcohol, drugs, gambling and sex addiction)
- Relationship problems
- Depression
- Pain control
- Dealing with depression
- Psychopathology
- Insomnia
- Confidence
- Performance anxiety
- Blushing
- Intrusive thinking
- Thought challenging techniques
- Planning for success
- Stress
- Pacing and leading
- Calibration
- Representational systems and strategies
- Sub-modalities
- Hypnotic language patterns – the Milton Model
- Elicitation of strategies
- Using and creating metaphors
- Reframing
- Relevancy
- Anchoring
- Changing states
- Dissociation and association
- Meta model
- The use of zones

What do I get from these modules?

These modules give you all of the knowledge, skills, scripts and protocols to start immediately providing treatments as a clinical hypnotherapist. You also receive all SICH-accredited certificates and diplomas in hypnotherapy and neuro-linguistic programming.

They are included as standard in both the weekend and intensive course, but there are optional modules available:

What are the optional modules?

Modules 4 and 5 can be added to your course to provide further knowledge and qualifications:

Optional module 4 – the NCH Hypnotherapy Practitioner Diploma (HPD)

Despite the similar names, there are two HPD's available in this course:

- **SICH** Hypnotherapy Practitioner Diploma – this is accredited by the Surrey Institute of Clinical Hypnotherapy
- **NCH** Hypnotherapy Practitioner Diploma – this is accredited by the National Council for Hypnotherapy

The SICH diploma gives you everything you need to become a professional hypnotherapist and join most hypnotherapy associations, but if you want a higher qualification issued by the National Council for Hypnotherapy, then you need to take module 4 as well.

Module 4 is dedicated to carry out the extra steps needed to be accredited with the NCH diploma. This includes additional training in the relief of other conditions including IBS and psoriasis, as well as paediatric therapy. This module also takes you through the learning outcomes set out in the Skills for Health National Occupational Standards.

By taking this extra module, you can gain an NCH diploma to go along with your SICH diploma which is the equivalent to an NVQ Level 4 and allows you to become a full member of the National Council for Hypnotherapy.

Optional module 5 – hypnotherapy marketing

So you may have the skills, but to become a successful hypnotherapist and reach your maximum income potential, you need to have the clients as well! Optional module 5 teaches you the most powerful and cost-effective advertising methods to grow your practice, and even takes you step-by-step as you build your own website!

- Massive action – It's not hard, but most therapists don't get it
- Learn the secrets to creating a website to get on page 1 of Google so people can find you
- What is search engine optimisation (SEO) and why do I need it? We make it easy
- Most advertising DOESN'T work, so what does?
- What did marketing gurus Saatchi and Saatchi keep secret about Google Adwords?
- Tricks that make it cheaper and easier for you to market your practice and draw in far more clients
- Social marketing – the easy way to create great content for your fan page with just one click
- Create your very own website in an easy-step-by-step approach which helps new clients find you!
- Learn the tricks of the trade from the tutors who have created their own thriving businesses

By the end of module 5, you will not only have the expert skills to be a clinical hypnotherapist, but also the marketing knowledge and your very own website to make your hypnotherapy business a great success!

FAQ – common questions and answers

Will the course equip me to practice as a hypnotherapist?

Yes, the SICH diploma gives you everything you need to immediately start your career in hypnotherapy. This includes skills, knowledge, confidence, protocols, scripts and everything else you require to bring in your clients, assess their problems and then begin the correct course of treatment.

Do I learn theoretical and practical skills?

Yes. Whilst some hypnotherapy courses from other providers focus on theories alone, the SICH diploma gives you the knowledge and also hands-on practice with clients under strict supervision, so you get a chance to actually induce someone into hypnosis and provide a successful session of treatment during the course.

How much support do the course tutors offer?

Two tutors will always be on hand to conduct the course and provide all of the help and support you need. At the end of the course, you will also be invited to become a member of the Surrey Institute of Clinical Hypnotherapy to receive on-going support and assistance from our team when starting off on your own career path.

What are the qualifications of the course tutors?

All our tutors are fully qualified (details at www.sich.co.uk) with years of experience in treating their own clients and also providing expert tuition to a great number of SICH students.

Does the course adhere to the National Occupational Standards?

Yes, SICH courses adhere to the National Occupational Standards, and this can be demonstrated.

Is SICH accredited by any authority?

Yes, the National Council for Hypnotherapy (NCH) formally accredits and recognises the SICH training school. If you want a diploma issued by the National Council for Hypnotherapy itself, then you can take optional module 4 to receive a NCH Hypnotherapy Practitioner Diploma which is equivalent to NVQ Level 4. This is optional as the SICH issued diploma still allows you to begin practicing.

Are the course tutors actively practising as hypnotherapists?

Both main tutors run thriving practices in London and Surrey, and complete approximately 1500 client hours per year each. This means that you get taught by hypnotherapy experts who have experience of treating many clients with varied problems whilst growing their own highly successful practices.

Do you demonstrate techniques?

Yes, course tutors will demonstrate most of the techniques you will learn.

The CNHC insists that hypnotherapy courses train to minimum standards of 120 hours of face-to-face study time and 450 hours of total study time. Does the SICH course meet these criteria?

Yes, the SICH meets and even exceeds these criteria. The Full HPD course including module 4 offers 160 hours of face-to-face training in small groups with a complete study time of 450 hours.

Can I see the full syllabus before the course begins?

The course syllabus is outlined on page 9. You will also receive a 600 page course-training manual which outlines all of the techniques and procedures in the course.

Does the course include business and practice management?

SICH trains you to become a professional hypnotherapist and also gives you the knowledge to start your own thriving practice. Both main tutors have extensive experience in operating their own successful hypnotherapy businesses and will share many vital industry tricks which help you attract in more clients and earn the highest possible income. The optional module 5 also delves into more knowledge when it comes to successfully marketing your new hypnotherapy services.

Why is the NCH diploma optional?

The standard course involves modules 1 to 3 which give you a diploma and certificate accredited by the Surrey Institute of Clinical Hypnotherapy. This allows you to join most professional hypnotherapy associations and gives you everything you need to start your own career as a hypnotherapist. Module 4 covers any remaining information needed to qualify for the Hypnotherapy Diploma accredited by the National Council for Hypnotherapy (NCH). The main differences are that the NCH diploma covers a few extra topics, is equivalent NVQ Level 4 and can also count as credit towards further education for hypnotherapy courses at the Open University. You may also receive full membership at the National Council for Hypnotherapy.

The module 4 NCH diploma is optional because it isn't essential to begin a career as a clinical hypnotherapist.

Modules 1-3 and the SICH diploma would easily suffice for this. That's why choosing the course with modules 1-3 is perfect if you simply want to gain the knowledge and skills to begin practicing immediately, whilst module 4 is optional if you want to add a diploma from the National Council for Hypnotherapy on top of your SICH diploma.

Does the course adhere to any code of ethics?

Yes, the SICH courses adhere to the National Council for Hypnotherapy code of ethics.

What is the tutor/student ratio? Will I receive enough personal attention?

SICH is for budding hypnotherapists who want the highest calibre of tuition, which is why our class sizes are usually limited to only 10 students with two main tutors - providing a close-knit tutor/student ratio of 1 to 5. This gives you plenty of personal attention so the tutors can take you through the course at your own pace and answer any questions you have.

Timetable of forthcoming courses in our Wallington, South London Office.

Course Dates	Location	Course	Availability*	Price	Duration
20-Sept-2014	London/Surrey	Diploma - Weekend	2 Places	£2200	2 Days each month Over 10 months
20-Sept-2014	London/Surrey	Diploma - Intensive	2 Places	£2200	4 Weeks – Mon - Fri 1st week Sat-Wed
