

Algebra Buddy Program

Algebra Buddy Program is a project that aims to assign incoming international students with their buddies – local students willing to help them settle into their new home for a semester. Buddies can help international students explore Zagreb, reveal tips and tricks about studying at Algebra, and above all, have fun while hanging together!

Freshmen parties

The beginning of every new adventure must be celebrated in style. As a welcome present for our freshmen students, we organize epic parties each year. Do not forget to put on your dancing shoes and prepare to bust some seriously wicked moves.

BBQ Party

Cool crowd. Cool atmosphere. A friendly chat and alluring smell of sizzling meat and veggies. That is a common theme at each academic year's end. Our chef has prudently protected his marinade recipe with a triple DES encryption. Our experts are trying their best to decode it, but let's be honest, it might take a while.

Geek Day – Open days of Algebra University College

This event is a boon for high schoolers, students and all tech lovers out there. On Open days we mingle with expert lecturers and steal their secrets about topics such as programming, robotics, multimedia, 3D graphics and video games.

Sports and Recreation

Fancy a game of Futsal? Do you consider yourself the king of the small pitch? You think no one can out dribble you? Perhaps you find being in your element in the swimming pool. We will certainly give you the opportunity to showcase your diving skills!

Gaming studio

If you have ever dabbled in the occasional computer game such as League of Legends, Counter Strike – GO and Overwatch, or you simply think that PewDiePie needs a successor, then you are in the right place! The first professional gaming and streaming studio in the region awaits your entrance.

International study excursions

Each year, our students get the opportunity to spend some time abroad and visit the best universities, development centers and companies. You get to travel to a cool destination, see and talk to the experts, meet the locals, get to know a new culture and have lots of fun in the process.

Library and Reading Room

A cozy space, filled to the brim with fresh content, technical literature and all the required textbooks for our courses. In addition to titles which are published by Algebra and specifically prepared for our study programs, the University College has obtained nearly 2000 titles of recent technical literature (mainly in English) which are available to students in our reading room.

Career Center

Building a career for every student or alumni is secured through our Career Center as the basic point of contact between students, the University College and employers. Our mission is to provide services that enable an effective transition from education to the labor market. We support students as they explore and further understand their career options, gain valuable experience and develop as professionals.
